Task-3

Open-VAS Vulnerability Scanner

Step 1: Install OpenVAS in any linux Distributions.

```
kali@kali: ~
Session  Actions  Edit  View  Help
┌──(kali㉿kali)-[~]
└─$ sudo apt install openvas
[sudo] password for kali:
Note, selecting 'gvm' instead of 'openvas'
The following package was automatically installed and is no longer required:
  libcrypt-dev
Use 'sudo apt autoremove' to remove it.

Upgrading:
  gvmd  gvmd-common  libgcrypt20  libgvm22t64  ospd-openvas

Installing:
  gvm

Installing dependencies:
  greenbone-security-assistant  gsad  gvm-tools  libmicrohttpd12t64  python3-terminaltables3

Suggested packages:
  python3-terminaltables3-doc

Summary:
  Upgrading: 5, Installing: 6, Removing: 0, Not Upgrading: 1796
  Download size: 4,877 kB
  Space needed: 17.9 MB / 60.5 GB available
```

Step 2: Run the configuration command to obtain the credentials for username and password, in order to use the utility.

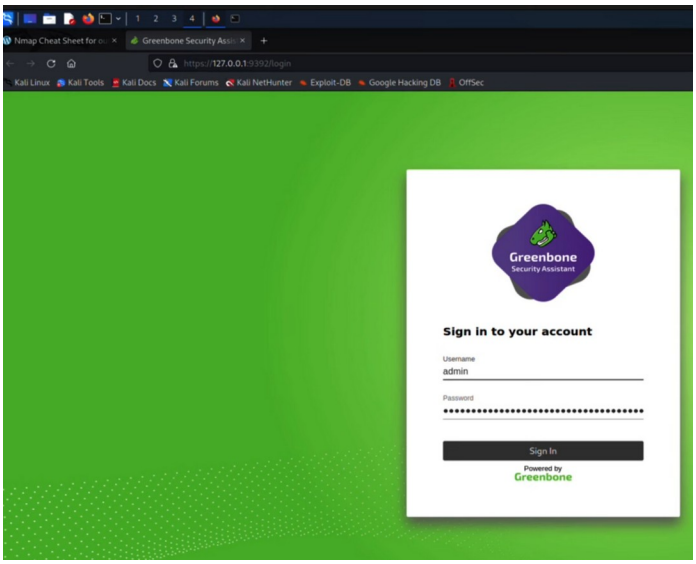
```
: Downloading SCAP data from
rsync://feed.community.greenbone.net/community/vulnerability-feed/24.10/scap-data/ to
/var/lib/gvm/scap-data
: Downloading CERT-Bund data from
rsync://feed.community.greenbone.net/community/vulnerability-feed/24.10/cert-data/ to
/var/lib/gvm/cert-data
: Downloading gvmd data from
rsync://feed.community.greenbone.net/community/data-feed/24.10/ to
/var/lib/gvm/data-objects/gvmd
Releasing lock on /var/lib/gvm/feed-update.lock

[*] Checking Default scanner
[*] Modifying Default Scanner
Scanner modified.

[+] Done
[*] Please note the password for the admin user
[*] User created with password 'c997708d-729f-44e3-8e4f-ce988db3871c'.

[>] You can now run gvm-check-setup to make sure everything is correctly configured
```

Step 3: Use the credentials to get into the Website which is hosted in the localhost.



Step 4: Feed the updates, using the command [`gvm-feed-update`] and reload the website.
